

A connective tissue disorder.

I am suffering from the Hypermobility Spectrum Disorder (HSD)

SOS

Hypermobility Spectrum Disorder (HSD)

A connective tissue
disorder.

Main symptoms:

- Hypermobile joints
- Chronic pain and fatigue

Caution:

- Please treat and move me with extra care. I have an increased risk of (sub)luxations and bleeding.
- Local anesthesia may be less effective or ineffective.
- Be aware of jaw dislocations and a fragile cervical spine when intubating.
